CAREER OBJECTIVE:

To begin my career as an Entry-Level Cloud Engineer by supporting cloud operations, monitoring, and incident handling using foundational knowledge of AWS services, networking, Linux, and basic scripting, while continuously learning and contributing to reliable cloud environments.

PROFESSIONAL SUMMARY:

Entry-Level Cloud Engineer with AWS Certified Cloud Practitioner credential and hands-on project exposure to core AWS services including EC2, S3, IAM, VPC, CloudFront, Lambda, API Gateway, and CloudWatch. Built cloud projects involving static website hosting, serverless APIs within VPC environments, and basic security and monitoring automation. Possesses foundational knowledge of networking, Linux, Git/GitHub, and basic Python and SQL, with a strong focus on cloud operations, monitoring, and incident support.

TECHNICAL SKILLS:

- **Cloud Platforms & AWS Services:** EC2, S3, IAM, VPC, CloudWatch, Lambda, API Gateway, Cloudtrail, Trusted Advisor, Auto Scaling, SNS, SQS, CloudFront, CloudFormation (concepts)
- **Operating Systems:** Linux (Ubuntu, Amazon Linux), Windows OS
- **Networking:** Subnetting, Security Groups, Route Tables, NACLs, Internet Gateway(IGW), NAT Gateway(basic), VPN(basic)
- **Programming & Scripting:** Python (basics), SQL (basics), Linux Shell Scripting (beginner)
- **Version Control:** Git, GitHub
- **Databases:** MySQL, RDS (basic), DynamoDB (basic)
- **Productivity & Tools:** Excel, Word, PowerPoint, Zoho CRM, Medics Easy

PROJECTS:

- **Personal Portfolio Website Deployment (AWS S3 + CloudFront)** - Designed and deployed a static personal portfolio website using Amazon S3 and CloudFront for secure, scalable, and cost-efficient content delivery. Implemented private S3 bucket access using Origin Access Control (OAC) and enforced HTTPS.

- **Serverless VPC API (Lambda in Private Subnets + API Gateway)** - Designed a secure serverless API using AWS Lambda running inside private VPC subnets, exposed through API Gateway. Integrated VPC interface endpoints for CloudWatch logging, eliminating direct internet access while ensuring scalable HTTPS connectivity.
🔗 **GitHub:** <https://github.com/Maha-1998-sundar/project-2-serverless-vpc-api>
- **Cloud Security & Observability Command Center (IAM + Lambda + EventBridge + DynamoDB + Cloudwatch)** - Implemented real-time monitoring and alerting using Amazon CloudWatch, AWS Lambda, EventBridge, and DynamoDB. Enabled automated event tracking, audit logging, and operational visibility through dashboards, alarms, and serverless workflows.
🔗 **GitHub:** <https://github.com/Maha-1998-sundar/aws-cloud-practitioner-portfolio/tree/main/project-3-cloud-security-observability>
- **Linux Notes Tracker with Git & GitHub** - Created a Linux-based notes tracking project to document commands and concepts using Markdown. Managed source code using Git and GitHub, practicing essential version-control workflows including cloning repositories, committing changes, and pushing updates to a remote repository.
